## Premium rates summary

For the fourth year in a row, the Workplace Safety and Insurance Board (WSIB) has reduced the average premium rate for Schedule 1 businesses. The reduction for 2020 is 17 per cent, a decrease from \$1.65 on every \$100 of insurable earnings in 2019 to an average of \$1.37 in 2020. The total cumulative reduction to the average premium rate since 2016 is 47.1 per cent.

Our 2020 premium rates were calculated using our new rate-setting model and North American Industry Classification System (NAICS)-based classification structure. Our new model better reflects individual claims experience and uses a two-step approach to set and adjust premium rates for businesses:

**Step one:** setting the class rate for each industry class based on their risk profile and share of responsibility to maintain the insurance fund.

**Step two:** looks at how each business's individual claims history compares to the rest of the businesses in their class/subclass. This means that your overall rate in the new model will reflect your individual claims experience and risk.

This approach ensures businesses pay a fair rate that is reflective of their industry and experience.

To help businesses prepare for any projected rate increases or decreases in our new model, rate movement is subject to both transition rules and regular rate framework movement rules. Businesses can better plan for the future and participate in the programs we offer to make a difference in their health and safety experience now.

Our 2020 premium rates completely eliminate the Past Claims Cost (PCC) component of premium rates that was previously used to reduce the WSIB's unfunded liability, and reflect lower administrative costs and New Claims Costs (NCC).

## Establishing premium rates

The Schedule 1 costs of the workplace safety and insurance system are funded through premium rates, which are applied to the insurable earnings of Schedule 1 businesses. Schedule 1 businesses are not all charged the same rate. To ensure fair premium rates, businesses are placed into 34 classes/subclasses aligned with the NAICS based on the type of work they do. Businesses that have more than one business activity will be classified according to their predominant business activity – the business activity with the highest amount of insurable earnings.

Each class/subclass has a different premium rate, reflecting the average risk of the business activities of the industries insured in that group. You can find more details on classification in our [Employer Classification Manual](#).

## Determining 2020 rates

We calculate premium rates annually to reflect the ongoing experience of businesses and the WSIB's latest financial requirements and targets. Under our new rate-setting model, each of the 34 classes/subclasses has a series of risk bands and each risk band has an associated rate, either above or below the class rate.

The class rate represents the premium rate a business would pay based on the collective risk profile for all the businesses within the class and the class's shared responsibility to maintain the insurance fund. If the class rate changes as a result of the overall claims experience of that class, it will affect the other risk band rates within that class.

Each business is assigned to a risk band that best represents its risk in relation to other businesses in its class. The difference between successive risk band rates is approximately five per cent.

Businesses in a given class that fall under the same risk band rate have similar risk profiles and will pay the same rate.

The following rates are determined for each business:

1. Projected premium rate: the rate the business would pay if there were no limits in risk band movement. This rate reflects the business's individual claims cost experience relative to the class to the extent the business is predictable (or credible). If a business is eligible for a decrease from their starting point rate, the projected rate may also contain a provision for funding transition costs.
2. Prior year rate: in 2020, this will be the "starting point rate," defined as the lesser of:
  - i. the 2019 premium rate<sup>1</sup> modified by a net ratio that considers three years of experience rating adjustments (the "net premium rate"); or
  - ii. the rate for the risk band that contains the net premium rate.

Net premium rate is calculated as follows:

- a) calculate total premium for 2016-2018 net of PCC
- b) calculate net rebate or surcharge for 2016-2018
- c) subtract rebate from or add surcharge to the premium from (a) above

---

<sup>1</sup> Weighted average using insurable earnings for cases with more than one rate

- d) divide (c) by (a) to get the net premium ratio
  - e) subtract PCC component from 2019 rate group rate
  - f) multiply the result from (e) by the net premium ratio and add the 2019 rate group PCC to this result
  - g) the result of (f) is the net premium rate
3. Actual premium rate: the rate a business will pay after applying the risk band movement limits defined by the [Employer Level Premium Rate Setting](#) policy to the prior year rate (or starting point in 2020) and projected premium rate (in 2020, the [Transition](#) policy will be applied to the starting point rate and projected premium rate).

The following process was used to determine 2020 rates:

1. Determine overall Schedule 1 average rate: \$1.37 for 2020 premium year.
2. Determine a fair cost (i.e. claims-based cost) for each NAICS class that recovers the required premium in total for the whole of Schedule 1.
3. Determine the class rate for each class that recovers the necessary premium based on insurable earnings distribution by risk band. Class rates and their corresponding risk band premium rates are included respectively in the sections [Class rates for risk banding](#) and [Table of risk band rates](#) of this manual.
4. Place businesses in their proper risk band based on their experience relative to the class.
5. Businesses' insurable earnings are placed into their corresponding risk band. Risk bands for each business are determined based on the projected rate.
6. For each business, compare the projected rate with the starting point rate and apply transition rules. Transition rules (no rate increases, all decreases to projected risk band for 2020) will determine the business's actual rate.
7. Adjust rates as needed to recover transition costs.

For more details on premium rate setting, see our policy on [Employer Level Premium Rate Setting](#).

The average Schedule 1 premium rate, class rates and rules for determining the actual premium rates are approved by the WSIB's Board of Directors. Premium rates are expressed as a dollar amount per \$100 of insurable earnings.

Premium rates include an amount for:

1. NCC – this covers the projected total future cost of injuries or illnesses expected to arise during the upcoming year, including any additional margins the WSIB may require.
2. Administration expenses – this is the cost required to administer the workplace compensation system in Ontario and fulfill legislative obligations.

The average Schedule 1 premium rate includes these components reflecting the financial premium requirement. For each of the classes/subclasses their premium rate also includes an NCC and Administration expense amount which is allocated based on claims experience and insurable earnings data from the most recent six years. For 2020, this is 2013 through 2018. Further details are included in the section [Class/subclass premium rate components](#) of this manual.

The WSIB sets an annual maximum ceiling for average earnings to determine benefits and premiums. The ceiling is set each year according to the *Workplace Safety and Insurance Act* (WSIA). The ceiling for the 2020 premium rate year is 175 per cent of the average industrial wage for Ontario from the most recent published Statistics Canada earnings data available on July 1, 2019. The WSIB annual maximum insurable earnings for 2020 is \$95,400, an increase of three per cent over the 2019 ceiling of \$92,600.

## **Classification scheme and data sources**

Businesses are assigned one or more six-digit codes adapted from NAICS classes/subclasses based on their business activities. The majority of businesses will have a single business activity and those that have more than one business activity will be classified according to their predominant business activity.

Businesses with distinct and unrelated business activities can request multiple classes/subclasses and would be eligible if they meet the WSIB's multi-rating policy criteria. See our policy on [Single and Multiple Premium Rates](#).

Certain businesses have been classified using an alternative approach due to their unique circumstances based on the workplace safety and insurance system. This includes [non-exempt partners and executive officers in construction](#).

These special cases are relevant only for industry classification by the WSIB but not to broader economic analysis. The NAICS system does not recognize this alternate treatment so the WSIB has established additional six-digit class/subclass codes to handle classification of these businesses.

The figures shown in this manual are based on the data available as of January 2019. You can get more recent information by contacting the WSIB (see the section [Contact information](#) of this manual).

## Our role

The WSIB is a statutory corporation created by an Act of the Ontario Legislature in 1914. The WSIB is responsible for administering the *WSIA*. The WSIB receives no government funding. We are funded solely through premiums paid by businesses insured by us. Revenue is also raised through returns on invested assets.

We help support people and businesses affected by workplace injuries and illnesses – providing a comprehensive bundle of insurance benefits as set out in the Act helping people recover and return to work by:

- providing benefits to people who become injured or ill at work and the dependents of people who have died as a result of a workplace injury or illness
- assisting in the return to work and recovery of work-related injuries or illnesses

Businesses covered by *WSIA*, are divided into two groups, referred to as Schedule 1 and Schedule 2. This manual pertains to Schedule 1 businesses only.

## Table of risk band rates

Beginning in 2020, we are using risk bands as part of setting premium rates. This process relies on pre-defined tables of risk band rates. There is one table applicable for each of the 34 classes/subclasses adapted from NAICS, which include the following:

- the risk band numbers
- the associated range of risk profile index values
- the class rate (risk band 60 in the risk band tables)
- the risk band rate factor
- the risk band premium rate which equals the class rate times the risk band rate factor

To determine the projected rate the maximum risk band for any class/subclass is 83 (i.e. 23 risk bands above the class rate's risk band). For 2020 the minimum premium rate is \$0.07 and the lowest risk band for any class/subclass cannot have a rate below \$0.07.

The risk band tables are also used for determining the prior year risk band (or starting point risk band) with no limitations. The following general rules are provided and can be used to expand the table:

- For risk bands below the class rate, the rate factors will be determined by applying a five per cent discount to the risk band factor of the risk band above. This means the risk band factor is 95 per cent of the risk band factor for the next band up. The risk band factor will be the lower limit of the risk profile index range.
- For each risk band above the class rate the rate factors will be determined by applying a five per cent increase to the risk band factor of the risk band below. This means, the risk band factor will be 105 per cent of the risk band factor for the next band down. The risk band factor will be the upper limit of the risk profile index range.
- The risk band rate equals the class rate times the risk band rate factor.

## **Transition to our new model**

### **Transition approach**

In order to help businesses smoothly transition into our new rate-setting model any initial projected rate increases will be staggered over time, while rate decreases were applied to 2020 rates. Projected decreases will also be applied in 2021 and 2022.

In 2021, businesses with projected premium rate increases will move up a maximum of one risk band from their 2020 risk band. In 2022, businesses that have not yet reached their projected premium rate will move up a maximum of two risk bands above their 2021 risk band.

### **2020 transition funding**

As part of transition to our new premium rate-setting model, in 2020 a rate adjustment has been applied to eligible businesses' rates representing the portion of their premium rate needed to ensure a smooth transition for all businesses.

Transition funding adjustments are applied after a business's rate has been determined based on their 2019 rate group rate, claims experience, the size of their business, new NAICS classification, projected rate increases or decreases and whether or not they were in an experience rating program previously.

Transition funding adjustments will only be applied during the transition period and will come to an end in 2023 when our regular premium rate setting policies will be fully in effect.

For more information on transition, see our [Employer Level Premium Rate Setting](#) and the [Transition](#) policies.

## **Definition of premium rate components**

### **New Claims Cost**

- |    |                 |   |
|----|-----------------|---|
| 1. | New Claims Cost | This covers the projected total future cost of injuries expected to arise during 2020 |
|----|-----------------|---|

### **Overhead expenses**

- |    |                         |   |
|----|-------------------------|---|
| 1. | Administrative expenses | WSIB expenses estimated for the year 2020, to administer the <i>WSIA</i>  |
| 2. | Legislative obligations | 2020 expenses the WSIB is required to fund under the <i>Occupational Health and Safety Act</i> , the Workplace Safety and Insurance Appeals Tribunal, Office of the Employer Advisor, Office of the Worker Advisor, Health and Safety Associations and research |
| 3. | Total overhead expenses | Total of administrative and legislative obligations expenses. This is the cost required to administer the workplace safety and insurance system in Ontario and fulfill legislative obligations  |

### **Past Claims Cost**

- |    |                  |  |
|----|------------------|--|
| 1. | Past Claims Cost | Historically, this has been a charge intended to recover the WSIB's unfunded liability. It is zero in 2020 and is not expected to appear in future years |
|----|------------------|--|

### **Premium rate**

Total cost per \$100 of insurable earnings required to fund new claims, overhead, and past claims

## Premium rate setting allocation rules for class/subclass

### New Claims Cost (NCC)

Each class/subclass may see changes in its NCC from year to year. In order to minimize this volatility, the NCC is determined first for six 'super classes' which are groups of classes/subclasses in similar broad economic sectors and then are distributed over the classes/subclasses in the super class group using their claims cost ratios (CCR).

The CCR for each class/subclass is compared to the CCR of its corresponding super class. This ratio indicates the relative costliness of an average claim for the class/subclass as compared to the average costs of the super class. The CCR is the ratio of six years of costs to six years of insurable earnings. The CCR used is the average of the CCRs for the last three calendar years to enhance stability.

In 2020 the super classes are defined as follows:

Class/ subclass	Class/subclass description	Super class
A	Agriculture	Other industries and services
B	Mining, quarrying and oil and gas extraction	Other industries and services
C	Utilities	Public sector
D1	Educational services	Public sector
D2	Public administration	Public sector
D3	Hospitals	Public sector
E1	Food, textiles and related manufacturing	Manufacturing
E2	Non-metallic and mineral manufacturing	Manufacturing
E3	Printing, petroleum and chemical manufacturing	Manufacturing
E4	Metal transportation equipment and furniture manufacturing	Manufacturing
E5	Machinery, electrical equipment and miscellaneous manufacturing	Manufacturing
E6	Computer and electronic manufacturing	Manufacturing

<b>Class/ subclass</b>	<b>Class/subclass description</b>	<b>Super class</b>
<b>F1</b>	Rail, water, truck transportation and postal service	Other industries and services
<b>F2</b>	Air, transit, ground passenger, recreational and pipeline transportation, courier services and warehousing	Other industries and services
<b>G1</b>	Building construction	Construction
<b>G2</b>	Infrastructure construction	Construction
<b>G3</b>	Foundation, structure and building exterior construction	Construction
<b>G4</b>	Building equipment construction	Construction
<b>G5</b>	Specialty trades construction	Construction
<b>H1</b>	Petroleum, food, motor vehicle and miscellaneous wholesale	Retail and wholesale
<b>H2</b>	Personal and household goods, building materials and machinery wholesale	Retail and wholesale
<b>I1</b>	Motor vehicles, building materials and food and beverage retail	Retail and wholesale
<b>I2</b>	Furniture, home furnishings, clothing and clothing accessories retail	Retail and wholesale
<b>I3</b>	Electronics, appliances, health and personal care retail	Retail and wholesale
<b>I4</b>	Specialized retail and department stores	Retail and wholesale
<b>J</b>	Information and culture	Technical services
<b>K</b>	Finance, management and leasing	Technical services
<b>L</b>	Professional, scientific and technical	Technical services
<b>M</b>	Administration, services to buildings, dwellings and open spaces	Technical services

<b>Class/ subclass</b>	<b>Class/subclass description</b>	<b>Super class</b>
N1	Ambulatory health care	Public sector
N2	Nursing and residential care facilities	Public sector
N3	Social assistance	Public sector
O	Leisure and hospitality	Other industries and services
P	Other services	Other industries and services

## **Overhead expenses**

Schedule 1 overhead expenses are allocated to the classes/subclasses in proportion to their NCC dollars and insurable earnings.

## **Past Claims Cost (PCC)**

In 2020, the PCC component has been eliminated given the current full funding position of the WSIB. It is not expected to appear in future years.

## New businesses

A new business is assigned one or more six-digit code adapted from NAICS at registration according to their business activities. The business's predominant class is determined at that time.

Businesses with less than 11 months of accident experience and insurable earnings will be charged the class rate of their predominant class, subject to the transition rules applicable to all businesses, until there is sufficient accident cost and insurable earnings information to calculate a business's risk profile, so that a premium rate relative to the class rate can be calculated. Please refer to the [Employer Level Premium Rate Setting](#) policy and the [Transition](#) policy for further details.

Our new premium rate setting model ensures that all new businesses take part in the premium rate setting process as soon as possible.

## **Multi-rated businesses**

Businesses that operate distinct and unrelated business activities can request multiple classes/subclasses and are eligible if they meet the WSIB's multi-rating policy criteria. See our policy on [Single and Multiple Premium Rates](#).

Class rates have been established reflecting minimal multi-rating. Classification shifts due to multi-rating will be reflected as part of any annual adjustments to class rates.

## Non-exempt partners and executive officers in construction

Under our new premium rate-setting model, non-exempt partners and executive officers in construction, who were previously classified under rate group (RG) 755, continue to receive a separate premium rate. This premium rate reflects the low risk of their work in comparison to the rest of the construction industry. The same premium rate is assigned to all non-exempt partners and executive officers in construction in a given year, although they are classified under any one of the five construction subclasses depending on the operations of their construction business. The 2020 rate for this group is \$0.12 per 100 of insurable earnings.

The 2020 premium rate considers the collective experience of all non-exempt partners and executive officers in construction as if they were a single business in the construction subclass with the highest percentage of insurable earnings and applying the rate framework formula to it. See our policy on [Employer Level Premium Rate Setting](#).

In 2020, the construction subclass with the highest percentage of insurable earnings from non-exempt partners and executive officers in construction is G1 Building Construction based on insurable earnings in 2016, 2017 and 2018. The below chart shows the distribution of insurable earnings between construction subclasses from 2016 - 2018 (IE stands for insurable earnings).

Predominant class	2016 IE (in millions)	2017 IE (in millions)	2018 IE (in millions)	2016 - 2018 IE (in millions)	%

<b>Total</b>	<b>\$535.8</b>	<b>\$547.3</b>	<b>\$596.6</b>	<b>\$1,679.7</b>	<b>100%</b>

'Others' in the chart above is composed of businesses classified only in RG 755 in 2019 (and prior years) and businesses with predominant classes other than construction. The distribution of insurable earnings in 2016- 2018 between these two groups is as follows:

Predominant class	2016 IE (in millions)	2017 IE (in millions)	2018 IE (in millions)	2016 - 2018 IE (in millions)	%
N/A (only RG 755 no other RG)	\$2.1	\$2.5	\$2.4	\$7.0	2%

<b>Total</b>	<b>\$123.0</b>	<b>\$128.1</b>	<b>\$129.7</b>	<b>\$380.9</b>	<b>100%</b>

## **Steps for calculating the 2020 non-exempt partners and executive officers rate**

The 2019 RG 755 non-exempt partners and executive officers in construction rate was \$0.13.

### **Actual rate before modifiers (your rate)**

Prior year rate (starting point rate from RG 755)	\$0.13
Class G1 premium rate	\$2.30
Prior year risk profile index (prior year rate/ class G1 premium rate)	0.05652
Prior year risk band	3
Band change	0
Adjusted actual risk band	3
<b>=      \$0.12      your rate before modifiers</b>	

Transition rules are applied as for any other business:

- non-exempt partners and executive officers in construction see an increase from the starting point (\$0.13) to the projected rate (\$0.55, see calculation below)
- their actual rate is defined as the lower of starting point rate or the risk band rate containing the starting point (\$0.12).

### **Predictability 90 per cent (for all non-exempt partners and executive officers in construction rated as a single business)**

Six year total insurable earnings (IE)	\$2,982,321,625
100% IE Predictability Standard (12,000 x maximum insurable earnings (MIE))	\$114,480,000.00
Actuarial predictability of IE (capped at 100%)	100.000%

Six year claim count	86
100% allowed claim count predictability standard	1,200
Actuarial predictability of total number of allowed claims (capped at 100%)	26.771%

Predictability value = 75% based on IE + 25% based on total number of allowed claims	81.693%
Actuarial predictability (arrived by locating the predictability value in the predictability scale)	90%

### Your projected rate before modifiers

(as a single business)

**Projected risk band is determined by locating the business's adjusted risk profile index in the projected risk band table**

$$\begin{array}{rcl}
 \text{Projected band} & \$ 2.30 & \text{class G1 premium rate} \\
 \times & 0.23783 & \text{risk band rate factor} \\
 = & \mathbf{\$ 0.55} & \text{your projected rate before modifiers}
 \end{array}$$

## **Greater employer accountability mechanism**

We have a mechanism in place to strengthen the link between premium rate setting and health and safety and return to work practices. Businesses in a class/subclass who have poor experience on a consistent basis become a potential candidate for further engagement on their health and safety and return to work practices. If they do not participate or cannot demonstrate improvement, then they could receive a significant rate increase three years after first identified.

The mechanism addresses two types of concerns for outliers:

- 1) encouraging health and safety and return to work practices
- 2) providing additional warranted premium equity

In 2020, a list of businesses that are potential candidates for the mechanism will be compiled with no impact to premium rates. For more information see our policy on [Employer Level Premium Rate Setting](#).
